

- **Future services for the outback.**
 - Like health, roads, services, insurance for evnts, bringing communities together, united visions of what the outback will look like
- Fair & equitable for all communities - one voice - one plan
- OCA is there to oversee & assist the best interest of both permanent and temporary users of the outback
- **Final summary – strategic plan**
 - Input to priorities
 - Robust community consultation –
 - who is OCA fully responsible for
 - clarification of model
 - prepare for new model
 - succession plans - paid model
 - training of community cert4 local
 - inclusion of all the communities in planning
 - funding for this style output
- Outback SA we are an asset – We all become aware of each other’s product – More signage information tourists – Maybe a combined trade picnic
- - Current Governance model
 - Does not provide services for a modern society
 - Desirable to have elected reps
 - Problems with one size fits all – rigid
 - National problem of travellers who do not contribute –
 - Current model not fit for purpose – too many complexities – increased transparency
 - Annual cycle to short. High responsibility on community CCS models capital verses recubent
 - Hybrid will take a lot of discussion on implantation – Foot in door to local govt – Social capital needs support – less focus on issues like garbage – We may have less influence on local govt – explore hybrid model
 - Needs to accept that changes will come
 - Contribution form industry
 - Interesting comparing communities with CCS & those without
 - Issues with compliance – whatever model needs address
 - More flexible & inclusive model
 - Equitable model
 - Plan for transition to local govt over time
 - Will not always please everybody – Devils in detail
- **Access to the Outback**
 - Lack of resources for management & regulation & information regarding different types of access in the outback.
 - Problem -

- 
- Tourism (unregulated access)
 - Legality impacts
 - Management/regulation
 - Maps & apps incorrect
 - Solution –
 - Convince gov to invest
 - Enforce regulate & inform
 - Signage
 - Communication
 - Education
 - Clear & concise
 - Method? Mechanism
 - Needs more funding
 - Communication
 - Authoritative source – government department
 - Outback pass? User pays access?
 - Right to quiet enjoyment and control of biosecurity on pastoral leases
 - Access plans that are enforceable
 - Clearly described
 - Support to enforce
 - Communications strategy to educate & inform public
 - **Future planning?**
 - Expectations
 - Build cohesiveness across the outback & relationships
 - Identify shared values & core principles
 - Listen & learn from others
 - Develop a joint approach to issues across the outback
 - Move forward & have real actions & outcomes
 - How to make the OCA work for us
 - Build a future for the outback
 - **Together unity**
 - Expectations
 - Develop relationships
 - reduce silos
 - build cohesiveness
 - key needs -
 - health
 - roads
 - education
 - telecoms
 - water
 - how to achieve? Scope prioritise
 - consolidation of communities union? Collective
 - access to funding?
 - Beyond the scope of individuals
 - Tired/support/fighting
 - Values + core principles = shared needs
 - Path forward
 - Outcomes actually happening
 - Clear line of sight to projects & areas to assist with (RDA) focus

- 
- Learn & listen to regional issues
 - Collective approach on how we will move forward/support to communities
 - Listen & learn
 - Move forward
 - Advocacy & lobbying
 - Help other communities move forward /invest
 - Connections & learn guidance
 - Clarity & path forward
 - Cohesiveness
 - How to make OCA work for us
 - Building relationships
 - Listen & learn
 - Influence capital programs
 - Cohesion
 - Transparency & strength
 - Outcomes
 - Meet, learn & listen
 - Support (how to get)
 - Asset (people/group)
 - Learn & integrate
 - Sick of government
 - United front
 - Listen & learn, develop understand
 - Help for small towns
 - **Tourism**
 - Problem: Inadequate infrastructure, including public toilets, traffic management, roads, water, waste, dump point already exists. But the expected mass tourism moving forward will only enhance it.
 - Outcome: Lets plan and act now with the adequate infrastructure, constantly keeping the future in mind.
 - How:
 - Managed water access points for visitors in the region
 - Infrastructure with ongoing management plan
 - 1. What are the essential needs?
 - 2. Who manages those essential things?
 - 3. Who will be ther overarching body to maintain it?
 - (Lobbying group for funding from one combined union on behalf of tourism in region...louder voice = bigger impact)
 - Extensive signage (100km to next dump point, water access etc?)
 - **Connected Communities**
 - How to utilise assets better
 - Problem:
 - Not connected
 - We fight battles individually
 - Repetition
 - We are all diff but have synergies
 - No formalised what to connect
 - No time, exhausted volunteers
 - We don't know about existing processes- people who may have gone through process

- Outcome:
 - Bigger influence – sharing knowledge
 - Capacity to carry ideas forward
 - Facilitation (someone to organise us to meet)
 - Some kind of “umbrella” organisation
 - Navigator for communities who struggle
 - Can help with problems
 - Has got a network
 - Help to find insurance templates
- Action
 - Network
 - Type in problem
 - Collective answer
 - Navigator
 - Employ someone
 - 12 with position
 - Events SA?
- Use people outside org from other areas to help out at events – how do we find them “frontier” “Rious club” offer them an incentive
- Find a way of not necessarily physically at the place – “App?” “volunteering app”
- Functional website (staffing)
- **Waste Management**
 - Links - environment
 - No universal system of waste management
 - Legacy issues to tidy up
 - System for waste management across all OCA areas
- **Good governance /Progress Assoc**
 - Problem:
 - Difficult to do governance of communities
 - Outcome:
 - How to get there:
 - Templates of governance
 - Assistance by experts
 - Difference governance models
- **OCA Governance**
 - Problem:
 - Current legislation not suitable
 - Independent advocacy (of gov)
 - Fit for purpose funding – access to outback
 - Identify necessary services
 - Value proposition for levy
 - What will be provided/who will provide
 - Autonomy from government to make decisions & employ staff
 - Outcome:
 - Saying = paying
 - Transparency in decision making choice of elected representatives & self determination
- **Airstrips**
 - Issues:

- Quicker transportation
- Who pays
- Registered versus ALA
- Insurance
- Opportunities
 - Tourism
 - Outback loop
 - Underutilised
 - RFDS Access
- Missing:
 - Highlevel view/ plan * Audit
- Balance between emergency access & economic dev.
- 1. Audit – economic/emergency – condition assessment
- 2. Priorities – Now & Future
- 3. Who? OCA & industry & communities
- **Roads Group**
 - Parking Bays on the Stuart & Eyre hwys – Further off the road – lean too – water
 - Greater Contribution of mining royalties
 - Borefield Road & Andamooka loop
 - More unsealed maintenance
- **Community Infrastructure & maintenance**
 - Succession planning of volunteer & paid person of community work
 - Blinmen – copper mine town
 - \$60k turnover - \$257K now
 - Only 1 staff member
 - Accommodation is an issue
 - Progress Association cant get a loan – borrowing money
 - New housing
 - Essential service
 - One overview –
 - Joined to business plan to support progress associations and lobby
- **Advocacy & Strategy**
 - Problem:
 - Engaging different community sectors/personalities
 - No cohesive collective advocacy & strategy that supports the aspirations of the whole outback. (divide & conquer)
 - Clear understanding of responsible bodies & hierarchies
 - End reliance on volunteers – accountability
 - Solution:
 - OCA board should be elected
 - Industry representation in advocacy
 - A bit like a council
 - Strategic plan
 - Autonomous of government
- **Attracting / Retaining Staff**
 - Problem of people needing / wanting more to live remotely
 - Issues include
 - Increased technology
 - Facilities
 - Wage competitors

- People need clear stipulation of business expectation/facilities/orientation of everyday life (ie where to get groceries)
- Outcome = INCENTIVISE
 - Travel
 - Tax benefits
 - Staff accommodation
 - Change visa requirements (90 days rural work instead of agriculture)
 - Wage incentives “save money, sell experience”
- **Climate change**
 - Govt in denial – doesn’t help mitigation argument
 - Can’t control – can adapt at community level – risk based
 - No emergency plans
 - Can minimize effect
 - No preparedness in outback
 - Safety perspective – hotter summers
 - Reduce working hours
 - Looking after staff
 - Will probably have more inexperienced OB traveller may exacerbate the issue
 - Requires educational programme
 - Awareness campaign
 - Climate change adaption plan
 - Collating a series of actions
 - Insurance already factors in climate change – effects of
 - Rethink our business
 - Be aware of ops that will come from adapting to climate change
 - Carbon economy
 - Marketing opportunity
- **Funding & Investment**
 - Problem
 - OCA does not adequately fund progress associations (support). Limited amount of funds available to administer outback \$ for basic service provision
 - Procedure
 - Determine basic level of services required across outback & costs
 - Develop sustainable funding model may including some user pays/community contribution
 - Solution
 - \$ from a variety of sources to meet needs
 - Gov to increase funding on basis of outback needing to be properly resourced to provide essential services to residents & visitors
- **Future Planning**
 - Problem – no united plan for the future
 - Goal
 - Need to be acting as “one”
 - Succession planning –
 - Communities must connect
 - Indigenous are missing in this discussion
 - Need to be advocates for ourselves identify “struggling” communities
 - Need our own representatives to have a voice
 - Action

- Great would be people on the board who have a certain skillset (eg Health)
 - Representative need to be flexible
 - Not appointing 1 person but a “position” where people can swap
 - Cohesive structure & strategic plan, check every 2 years
 - District project
 - Every 2 year review
 - Everybody has a say
 - All progresses need to get on same page
 - Plan, share, make decision
 - Communication & transparency to know what we as communities want
 - Comm – OCA
 - More structured “meetings” between communities in person eg picnic get together
 - Personal contact
 - Can identify points of struggle
 - “working group”
 - Maybe 4 months or once a year
 - In a community
 - OCA to suggest/supply a structure for us to do this eg form a group of advisors who can contact comm or comm can contact to find support
 - Create a directory of all people
 - Needs to be maintained!!!!!!
 - Meet in Andamooka before end of 2021
- **Health**
 - Disconnect between service provision, state & commonwealth
 - What is the problem
 - What is the solution / outcome
 - Cross border issues with covid
 - Aboriginal controlled health services don't provide inclusive healthcare (Oodnadatta)
 - Ambulance provision is not always available
 - Stable medical & nursing workforce
 - We want emergency services
 - We need good primary healthcare services
 - Wellness services – mental health (focus on wellness not just illness)
 - Care in the home
 - Aged care services is an issue
 - Solution – OCA (service delivery)/RFDS
 - **Health**
 - Health – water – education
 - Infrastructure – water insurance
 - Connectivity – waste – roads
 - Volunteers – services – change by the people
 - Internet – roads – staff 0 water
 - Job skills – training centre
 - Model to encourage people to outback
 - Educating tourism
 - Rubbish – road – signage

- Equity
- Funding – insurance – fund raising
- Outback to be better connected
- Incentive to move to outback
- **Health**
 - Lack of services (accessability or services)
 - Services which exist are not well promoted
 - Overarching lack in regional areas
 - Aged care – all types of related services
 - Consistent quality services available for all
 - Communication for all
 - Day to day
 - Telehealth 0 relies on telecommunications infrastructure & digital literacy
 - RFDs services are vital
 - Problem is bigger than the OCA but they have a vital role in advocacy
 - Look at services for helping healthy people stay healthy
 - Grants for business set up for these services
 - Wellness events – for groups of communities – is this an area for community development officers?
 - Decentralising service provision – Centrelink etc
- **Funding model**
 - Accountability & coordination of what funding is coming into region
 - 1st dollar issues (co-contribution) support
 - Better governance scrutiny/transparency of who funding is provided to
- **Governance**
 - Structure to effectively lobby
 - Gov – Fed/state
 - Issue is divide between Feds/state (local gov may pave way for more effective lobbying/funding)
 - OCA – Independent advisory group – Communities collective
 - Creates transparency /accountability
 - Look for 'out of square' funding additional to gov
 - Major events, collaborative
 - Mining tenants – short term
 - Users approx. 600 annually x \$2000 = 120,000 – offset to projects /small town assistance
 - Exercise caution about what you take on short term/one off that this does not become expectation of gov to pass on responsibility long term
- **Equity**
 - Insurance – re facilities & events
 - Community Reps –
 - Meetings via zoom across all communities run by OCA chairperson
 - community issues or success
 - funding application support
 - Water
 - Power – trial environmentally – solar/wind with diesel backup
 - Education
 - Roads
 - Waste into the future
 - Health/ telehealth system /airstrips

- Aging of the outback – lack of youth – employment
- Volunteer – re CFS, ambulance, road rescue
- Airstrips
- Transport – personal/freight
- Communication – mobile phone, internet (most gov & other are online)
- Postal services
